

# Intro to Safe Communications

Teaching Tech

**Introduction 01**

**04 Phishing Schemes**

**Review: Making  
Contacts 02**

**05 Q&A**

**Spam Calls & Caller  
Safety 03**

# Introduction

- Get to know us!
- What is our goal?
- Get to know the program:
  - Meetings
  - Flashcards
- Plan for today

# Spam Calls & Caller Safety

# What are Spam Calls?

“Spam includes all forms of unwanted communications. Typically, spam is directed to large numbers of users for the purposes of advertising, phishing, spreading malware, etc.”

# How to Respond

- Don't engage with caller
- If possible, block or do not answer unknown answers
- Check voicemail if unsure

# How to Respond Cont.

- DO NOT give out personal information:
  - Name
  - Address
  - Social security #
  - Financial information

**If in doubt, do not  
respond!**

# How to use Caller ID

Caller ID is a very important tool in distinguishing spam calls from important, wanted calls. We will now go over blocking calls, as well.

# Making Contacts

# What are Phishing Scams?

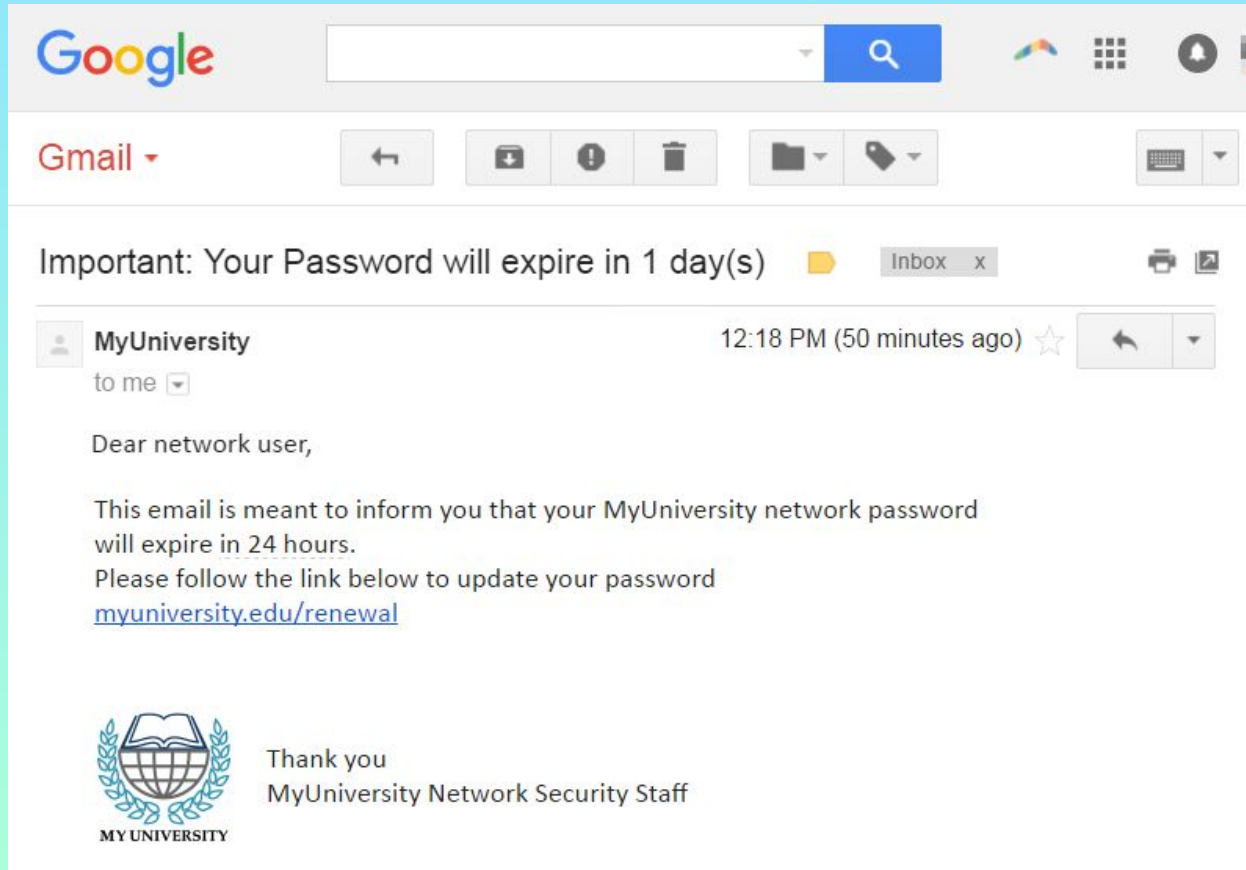

Attackers deceive people into revealing sensitive information or installing viruses, often through calls, texts, and emails.

# How to Identify Text and Email Scams

- Check the sender
- Check the link
  - Do NOT click on any links you are not sure about
- Check for warnings
- Are you expecting this text/email?
- Is it too good to be true?

# Identifying Phishing Scam Examples:

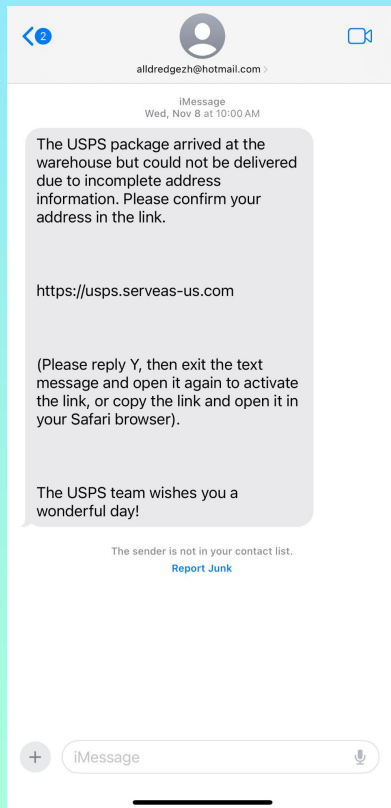

# Ignore and Report

- NEVER click on links in the email or text message
- NEVER respond
- Report texts as junk
- Send emails to spam/junk
- Block

# Reporting Example with Gmail:

# Reporting Example with Messages:

# Q&A

Feel free to ask us any questions specific to this lesson on cybersecurity or any other topic. We are happy to help with anything!

**See you  
next class!**
